.....

02. A user accidentally deleted an important file from their Desktop. How do you recover it?

.....

.....

.....

03. A user says their wired office mouse and keyboard suddenly stopped working. How do you troubleshoot this?

.....

.....

.....

04. An application or window is frozen and will not close when clicking the "X" button. How do you force it to close in Windows?

.....

.....

.....

05. A user reports that their local desktop printer is turned on but will not print documents, and they are stuck in a queue. How do you resolve this?

.....

.....

.....

06. A user's laptop connects to the office Wi-Fi but shows "No Internet, Secured." What basic networking commands would you use via Command Prompt to diagnose this?

.....

.....

.....

07. What is the difference between a static IP address and a dynamic IP address?

.....

.....

.....

.....

08. What is the difference between a Switch and a Router?

.....

.....

.....

.....

09. Explain what a ping request timed out error means.

.....

.....

.....

.....

10. Which protocol is responsible for automatically assigning IP addresses, subnet masks, and default gateways to client devices?

.....
